

## Press Release

VNG Gasspeicher GmbH / Tender Procedure / Storage Products / Protze

### Innovative Tender Procedure with easystore

**VNG Gasspeicher GmbH is marketing available capacities for the 2014/15 storage year using a two-stage tender procedure.**

**Leipzig, 28th of October, 2013.** By marketing creative products, the VNG Gasspeicher GmbH's has been able to ensure that their storage capacities are once again fully booked. And in order to keep it this way, VGS has developed, together with their market partners, a new procedure on the recently introduced platform easystore. As part of this innovative tender procedure, VNG Gas Storage is marketing the capacities still available for the 2014/2015 storage year early - in November, 2013.

The tender procedure is taking place from 11.11.2013 – 14.11.2013 and is divided into 2 phases. In the first, the customers themselves become their own product designer. They configure the storage product according to their own needs and can also provide an indicative offer for it. VNG Gasspeicher examines the product requests received and then publishes a selection of them to be offered. In the second phase, interested parties are able to submit binding bids upon these selected products. All participants will then be informed of the tender procedure's outcome within two hours of its closing.

At this time, a total of around 30 million m<sup>3</sup> (340 GWh) of working gas volume along with services tailored for anything from seasonal to trading-oriented usage - as you wish - are still available.

All details concerning the tender procedure are available at [www.vng-gasspeicher.de](http://www.vng-gasspeicher.de) or simply call us at 0341-443 2956.

#### **VNG Gasspeicher GmbH**

VNG Gasspeicher GmbH is a fully owned subsidiary of VNG – Verbundnetz Gas Aktiengesellschaft (VNG) registered in Leipzig. As the third largest storage system operator in Germany, we provide our customers with a total capacity of around 2.6 billion cubic meters at our six storage locations. The geographical locations of our underground facilities, as well as their network connections, allow for access to the important European trading markets. VNG Gasspeicher stands for innovative products

and individual product combinations meeting the demands of the market and marked by flexibility and reliability. Further information may be found at [www.vng-gasspeicher.de](http://www.vng-gasspeicher.de)
